To the one and only innovator of Rock n Roll. Elvis might have given it sex but you gave it the tools to live on long after all of us. God bless the first real guitar god!!

Happy Birthday Buddy! The only thing that died that day was your body. Everything else is very much still alive and kicking strong, including your spirit. I know you're out there helping others everyday to feel better and do great things, giving them the chance to do what you sadly weren't able to. Thanks for saving my life during these hard times. All the best to you. Buddy Holly Lives!

Happy Birthday Buddy! God blessed us on 9/7/36 and continues to bless us every time your music plays and memories and photos of you are shared.

Getting to know you through your music and through friendships formed with your family has been nothing short of a miracle for me. People ask if it's possible to fall in love with someone you've never met and my answer is yes, because that is exactly what's happened to me. I have fallen in love with your soul, your music, and your family. Thank you Buddy for everything you've given us! I hope heaven throws you the biggest birthday bash ever!!!
